

Addendum I: Tables

Chapter 1 The Clinical Features of Smallpox

Table 1.1	A classification of clinical types of variola major.....	4
Table 1.2	The frequency and case-fatality rates of different clinical types of variola major, according to vaccination status (presence of a scar) in hospitalized patients in Madras.....	5
Table 1.3	Frequency of symptoms (percentages of cases) in the pre-eruptive stage in variola major and variola minor.....	6
Table 1.4	Serological evidence for variola sine eruptione in contacts of cases of smallpox.....	29
Table 1.5	Comparison of titres of complement-fixing and haemagglutinin-inhibiting antibodies among vaccinated close contacts of cases of variola major and vaccinated controls.....	31
Table 1.6	Frequency of haemorrhages (percentages of cases) in different anatomical sites in early and late haemorrhagic-type smallpox.....	37
Table 1.7	Classification of clinical type of cases of variola minor.....	39
Table 1.8	Results of tests for platelet function, vascular integrity and blood coagulation in smallpox.....	46
Table 1.9	Age- and sex-specific case-fatality rates of 346 hospitalized smallpox patients and 502 nonhospitalized rural smallpox cases in Bangladesh.....	51
Table 1.10	Protection against challenge vaccination with vaccinia virus among persons who had recovered from smallpox.....	51
Table 1.11	Effect of vaccination in infancy on the severity and case-fatality rates in variola major, according to age groups.....	53
Table 1.12	Age and vaccination status of cases of variola major occurring after importations into western countries during the period 1950–1971.....	53
Table 1.13	Age-specific case-fatality rates of smallpox in unvaccinated persons in India.....	54
Table 1.14	Distribution of principal clinical types of smallpox in pregnant and non-pregnant women and in men in the age-group 15-44 years, as related to vaccination status.....	55
Table 1.15	The effect of smallpox on the outcome of pregnancy.....	55
Table 1.16	Alternative diagnoses in suspected but unconfirmed cases of smallpox.....	63
Table 1.17	Seroprophylaxis of smallpox: effects of vaccinia-immune gamma-globulin on the occurrence and severity of smallpox in vaccinated case contacts.....	65
Table 1.18	Case-fatality rates in patients treated with either of two thiosemicarbazones and placebos.....	66
Table 1.19	Summary of results of thiosemicarbazone prophylaxis in smallpox.....	67

Chapter 2 Variola Virus and Other Orthopoxviruses

Table 2.1	The classification of poxviruses of vertebrates.....	73
Table 2.2	Species of the genus <i>Orthopoxvirus</i>	73
Table 2.3	Biological characteristics of recognized species of <i>Orthopoxvirus</i>	87
Table 2.4	Haemadsorption in human embryo fibroblasts incubated at 40 °C for 48 hours after being infected with variola virus at a multiplicity of infection of 1 plaque-forming unit per cell.....	99
Table 2.5	Comparisons of the cleavage sites produced by a battery of 20 restriction endonucleases in 7 matching <i>HindIII</i> fragments of variola and monkeypox viruses.....	103

Table 2.6	Biological characteristics of cowpox and variola major viruses and of several hybrid clones derived from them.....	104
Table 2.7	Animals from which vaccinia virus has been recovered (infection from human sources always possible).....	105
Table 2.8	Some biological characteristics of several different laboratory strains of vaccinia virus.....	106
Table 2.9	Biological characteristics used in diagnostic laboratories to differentiate between orthopoxviruses that infect man	113
Table 2.10	Relative efficiency of 4 laboratory methods for diagnosing variola or human monkeypox infections. Tests on material from vesicles or scabs in 981 positive specimens from 6919 cases of suspected smallpox or monkeypox, accumulated between January 1966 and March 1981	113
Table 2.11	Viability of variola virus in scabs held at various temperatures and relative humidities for up to 16 weeks	116
Table 2.12	The viability of vaccinia virus in aerosols at various intervals after spraying.....	116

Chapter 3 The Pathogenesis, Pathology and Immunology of Smallpox and Vaccinia

Table 3.1	Prolonged presence of variola virus in throat swabs from contacts of cases of smallpox (data expressed as log pock-forming units per swab)	129
Table 3.2	Relationship of in vitro virus release to in vitro and in vivo parameters of virus dissemination.....	131
Table 3.3	Recovery of orthopoxviruses from tissues of healthy animals thought to have been naturally infected.....	145
Table 3.4	Recovery of orthopoxviruses from animals that had been experimentally infected some weeks earlier and showed no clinical signs at time of recovery of virus	145
Table 3.5	Comparison of the protective activity of three types of antiserum administered passively to rabbits before challenge infection with rabbitpox virus	163

Chapter 4 The Epidemiology of Smallpox

Table 4.1	Efficiency of reporting of smallpox In Kano (an urban area In Nigeria), as estimated from facial pockmark surveys in the age group 0-14 years	174
Table 4.2	Age distribution and case-fatality rates of smallpox in India and in western and central Africa	176
Table 4.3	Age distribution and case-fatality rates of smallpox in vaccinated and unvaccinated subjects in 6 states of India, 1974–1975	176
Table 4.4	Case-fatality rates of variola major in different geographical areas for the total population and the age group 0-4 years	177
Table 4.5	Age-specific case-fatality rates in variola minor (data collected during the Intensified Smallpox Eradication Programme)	177
Table 4.6	Case-fatality rates of smallpox in different geographical areas (data from country reports submitted prior to certification of eradication of smallpox).....	178
Table 4.7	Variola virus in the oropharyngeal secretions and urine of cases of variola major.....	184
Table 4.8	Variola virus in the oropharyngeal secretions of cases of variola major.....	184
Table 4.9	Recovery of variola virus from the vicinity of patients with variola major.....	186
Table 4.10	Frequency of transmission of smallpox to household contacts in villages in Pakistan by cases occurring in unvaccinated and vaccinated subjects.....	190
Table 4.11	Effects of population density on the numbers of unvaccinated persons remaining per unit area (km ²), at various levels of vaccination coverage.....	197

Table 4.12	First generation secondary attack rates (or the equivalent) in measles, chickenpox and smallpox.....	200
Table 4.13	Prolonged transmission of smallpox in several nomadic encampments in Somalia in 1977.....	205

Chapter 5 The History of Smallpox and Its Spread around the World

Table 5.1	Important events in the history of smallpox, from ancient times to 1900.....	212
---------------------------	--	-----

Chapter 6 Early Efforts at Control: Variolation, Vaccination, and Isolation and Quarantine

Table 6.1	Important events in the history of smallpox control, from ancient times to 1900.....	247
Table 6.2	The use of variolation for the control of natural smallpox in Boston, 1700s.....	257
Table 6.3	Record of vaccine lymph issued by the National Vaccine Establishment, Great Britain, late 1800s.....	267
Table 6.4	A comparison between the number of smallpox deaths per million population in German states before and after the German vaccination law of 1874 (compulsory vaccination and revaccination) and in Austria (in which only primary vaccination was practised), during the same period.....	273

Chapter 7 Developments in Vaccination and Control between 1900 and 1966

Table 7.1	Relation between potency measurements of preparations of freeze-dried vaccine stored at 37 °C for various periods, by pock counting on the chorioallantoic membrane and by rabbit-skin scarification.....	289
Table 7.2	Length of the incubation period in 259 cases of postvaccinial cerebral damage after primary vaccination.....	301
Table 7.3	Complications of smallpox vaccination in the USA for the year 1968, as determined by the CDC national survey. Numbers of different kinds of complication by vaccination status and age.....	304
Table 7.4	Complications of smallpox vaccination in the USA for the year 1968, as determined by the CDC national survey. Data of Table 7.3 expressed as cases per million vaccinations.....	304
Table 7.5	Complications of smallpox vaccination in 10 states of the USA for the year 1968. Numbers of different kinds of complications by age and vaccination status.....	305
Table 7.6	Complications of smallpox vaccination in 10 states of the USA for the year 1968. Data of Table 7.5 expressed as cases per million vaccinations.....	305
Table 7.7	Vaccination status of subjects with ocular vaccinia.....	306
Table 7.8	Incidence of postvaccinial encephalopathy (in infants under 2 years of age) and postvaccinial encephalomyelitis (in individuals over 2 years of age) after primary vaccination, in various places and at various times.....	307
Table 7.9	Cases of encephalopathy after the vaccination of infants less than 1 year of age in the Netherlands, 1959–1970.....	308

Chapter 8 The Incidence and Control of Smallpox between 1900 and 1958

Table 8.1	Western Europe: numbers of reported cases of smallpox in selected countries, 1920–1958.....	318
Table 8.2	Eastern Europe: numbers of reported cases of smallpox in selected countries, 1920–1958.....	319
Table 8.3	Europe: numbers of reported deaths from smallpox in selected countries, 1900–1919, by quinquennium.....	321
Table 8.4	England and Wales: numbers of reported cases of and deaths from variola major and variola minor, 1911–1958.....	325
Table 8.5	Sweden: status of smallpox, 1900–1962.....	327

Table 8.6	North America: numbers of reported cases of smallpox, 1920–1952	328
Table 8.7	Central America (excluding Belize) and Panama: numbers of reported cases of smallpox, 1920–1958	329
Table 8.8	United States of America: numbers of reported cases of and deaths from variola major and variola minor, 1900–1950	330
Table 8.9	South America: numbers of reported cases of smallpox in selected countries, 1920–1958.....	334
Table 8.10	Eastern Asia: numbers of reported cases of smallpox in selected countries, 1920–1966.....	336
Table 8.11	China: locations of smallpox vaccine production institutes and other particulars of vaccine production in 1950, when the national smallpox eradication campaign commenced, and in 1979.....	337
Table 8.12	China: numbers of doses of smallpox vaccine issued, 1950–1963	340
Table 8.13	China: numbers of smallpox cases reported, 1950–1965, by administrative division.....	341
Table 8.14	Shanghai: smallpox vaccination, 1946–1951	342
Table 8.15	Shanghai: cumulative proportion of vaccinations relative to population and the incidence of smallpox in 1951.....	343
Table 8.16	Japan: numbers of reported cases of and deaths from smallpox, 1892–1915.....	343
Table 8.17	Indian subcontinent and Afghanistan: numbers of reported cases of smallpox in selected countries, 1920–1966.....	347
Table 8.18	South-western Asia: numbers of reported cases of smallpox in selected countries, 1920–1963.....	350
Table 8.19	North Africa: numbers of reported cases of smallpox, 1920–1964.....	352
Table 8.20	Egypt: numbers of reported cases of and deaths from smallpox, 1886–1931	353
Table 8.21	Western Africa: numbers of reported cases of smallpox in selected countries, 1920–1966.....	355
Table 8.22	Central Africa: numbers of reported cases of smallpox in selected countries, 1920–1966	356
Table 8.23	Eastern Africa: numbers of reported cases of smallpox in selected countries, 1920–1966.....	357
Table 8.24	Southern Africa: numbers of reported cases of smallpox in selected countries, 1920–1966	360

Chapter 9 Development of the Global Smallpox Eradication Programme, 1958–1966

Table 9.1	Estimated cost of smallpox eradication as at 1959, and budget for smallpox programmes, 1958–1960.	369
Table 9.2	Number of WHO staff posts and estimated expenditure for malaria eradication from the WHO regular budget and from funds provided to WHO through the Malaria Eradication Special Account and by other international agencies, 1955–1970	383
Table 9.3	Expenditures of funds placed at the disposal of WHO from all sources, for all purposes, for malaria eradication, 1955–1970; for smallpox control, 1955–1958; and for smallpox eradication, 1959–1970	384
Table 9.4	Expenditure by PAHO for smallpox eradication, 1953–1966.....	391
Table 9.5	Countries and territories believed to have endemic smallpox, 1959 and 1967: summary by continent	395
Table 9.6	Countries and territories in Africa, the Americas and Asia believed to have endemic smallpox, 1959 and 1967.....	396
Table 9.7	Expenditure for smallpox eradication by WHO and PAHO, 1959–1966.....	398
Table 9.8	Voluntary contributions in cash or in kind (value of vaccine donations) to the WHO Special Account for Smallpox Eradication, 1958–1966.....	401
Table 9.9	Status in February 1965 of vaccine contributions pledged in response to the emergency appeal of June 1963	402

Table 9.10	Planned phasing of smallpox eradication programmes assisted by WHO, 1967–1976; extracted from the Director-General's report to the Nineteenth World Health Assembly	412
Table 9.11	Estimated number of smallpox vaccinations to be carried out with international assistance, 1967–1976j extracted from the Director-General's report to the Nineteenth World Health Assembly	413
Table 9.12	Anticipated expenditure on the Intensified Smallpox Eradication Programme, 1967–1976; extracted from the Director-General's report to the Nineteenth World Health Assembly.....	413
Table 9.13	Nineteenth World Health Assembly, May 1966: results of votes on budget proposals	416

Chapter 10 The Intensified Smallpox Eradication Programme, 1967–1980

Table 10.1	Length of service and relevant previous experience of the professional staff of the Smallpox Eradication unit at WHO Headquarters, 1966–1987.....	431
Table 10.2	WHO seminars and meetings on smallpox eradication, 1967–1978 (excluding those associated with certification of eradication).....	448
Table 10.3	Estimated requirements and available resources as at July 1975, in addition to those provided under the WHO regular budget, 1975–1977	460
Table 10.4	Director-General's budgetary allocations for smallpox eradication for 1967 and estimated actual expenditure.....	461
Table 10.5	Expenditure on smallpox eradication from the WHO regular budget in real and constant dollars, 1967–1979	463
Table 10.6	Contributions for smallpox eradication in cash or in kind to the WHO Voluntary Fund for Health Promotion, Special Account for Smallpox Eradication, and from sources of bilateral support, 1967–1979	464
Table 10.7	Contributions in cash or in kind to the WHO Voluntary Fund for Health Promotion or to special accounts, by year, 1956–1979.....	466
Table 10.8	International expenditure on smallpox eradication, 1967–1979.....	467
Table 10.9	Quantities of vaccine supplied annually, by country, from vaccine donated to WHO, 1967–1979.....	470
Table 10.10	World total of smallpox cases as recorded in April 1967 and as revised in 1987	477
Table 10.11	India and Somalia: sources of reports of outbreaks.....	509

Chapter 11 Smallpox Vaccine and Vaccination in the Intensified Smallpox Eradication Programme

Table 11.1	Quantities of smallpox vaccine distributed through WHO, 1958–1979.....	542
Table 11.2	WHO survey, 1967: numbers of laboratories throughout the world producing freeze-dried smallpox vaccine, and numbers responding to the WHO questionnaire.....	543
Table 11.3	WHO survey, 1967: vaccinifer or medium used for vaccine production	545
Table 11.4	WHO survey, 1967: strains of vaccinia virus used for vaccine production.....	545
Table 11.5	WHO survey, 1967: initial potency of 3 production lots of vaccine	546
Table 11.6	WHO survey, 1967: stability after 4 weeks at 37 °C of 3 production lots of vaccine.....	546
Table 11.7	WHO survey, 1967: bacterial content of vaccines	547
Table 11.8	Independent testing in 1967 by the WHO International Reference Centre for Smallpox Vaccine in Bilthoven of production batches intended for use in the eradication programme or in experimental production	549
Table 11.9	WHO short-term consultants and countries visited, 1967–1974.....	556

Table 11.10	Variation in results of titrations of vaccinia virus according to age of chick embryos at time of inoculation	559
Table 11.11	WHO quality control of freeze-dried vaccine: results of tests carried out in WHO reference centres for smallpox vaccine in Bilthoven and Toronto on experimental and production batches, 1967–1980	560
Table 11.12	WHO quality control of freeze-dried vaccine used in the Intensified Smallpox Eradication Programme: results of tests carried out in WHO reference centres for smallpox vaccine in Bilthoven and Toronto on samples submitted from the field, 1967–1980	561
Table 11.13	WHO quality control of vaccine in use for the Intensified Smallpox Eradication Programme: results of tests carried out, by WHO region, 1971–1974	561
Table 11.14	Smallpox vaccine production in Bangladesh, India, and Indonesia, 1966–1977	563
Table 11.15	Smallpox vaccine contributed to the WHO Voluntary Fund for Health Promotion, Special Account for Smallpox Eradication, 1967–1984.....	564
Table 11.16	Take rates obtained with the bifurcated needle (multiple puncture) and scratch inoculation.....	571
Table 11.17	Comparison of take rates between the first and second half of a series of revaccinations with a single bifurcated needle flamed before each vaccination.....	571
Table 11.18	Results of revaccination of 181 schoolchildren in Delhi, using 2 insertion sites and either the rotary lancet or the bifurcated needle.....	572
Table 11.19	Comparison of multiple pressure and Jet injection vaccination techniques in 2 towns in Amapá Territory, Brazil	577
Table 11.20	Classification of strains by degree of pathogenicity.....	583
Table 11.21	Strains of vaccinia virus used for production of freeze-dried vaccine in 1968 and in 1971.....	584
Table 11.22	Results of large-scale study (Japan, 1974) of response to various vaccines.....	586
Table 11.23	Study of response to various vaccines (Japan, 1974): temporary anomalies on encephalography.....	587
Table 11.24	Take rates following primary vaccination and revaccination with tissue culture and calf lymph vaccines (Lombok, Indonesia, 1973)	589
Table 11.25	Rate of protection afforded by vaccination	591
Table 11.26	Effect of vaccination after exposure on occurrence of smallpox in family or household contacts.....	591

Chapter 12 South America

Table 12.1	Numbers of reported cases of smallpox in the Americas, 1959–1971	594
Table 12.2	Latin America: WHO and PAHO expenditure for smallpox eradication, 1953–1971	597
Table 12.3	South America: population and number of reported smallpox vaccinations, 1967–1972	599
Table 12.4	Paraguay: proportion of persons, by age group (years), with vaccination scars in 4 districts, 1971	599
Table 12.5	Brazil: comparison of vaccination campaigns using the multiple pressure technique (Belém) and the jet injector (Macapá)	602
Table 12.6	Brazil: numbers of vaccinations planned and performed in the mass campaign, 1966–1971	604
Table 12.7	Brazil: results of vaccination assessment in 26 <i>municípios</i> in 2 states.....	606
Table 12.8	Brazil: number of vaccinations performed during the smallpox eradication programme, by states and territories, 1967–1971	609
Table 12.9	Brazil: number of reported cases of smallpox, by states and territories, 1967–1972	610
Table 12.10	Brazil: susceptibility of residents in affected households, by age and by urban and rural area.....	612
Table 12.11	Brazil: number of primary cases and attack rate among household contacts, by immunity status, in 27 rural outbreaks of smallpox, 1969.....	612

Table 12.12	Brazil: number of reported cases of smallpox in 4 states in which special surveillance-containment programmes were conducted, 1968–1969.....	614
Table 12.13	Brazil: number of reported and suspected cases of smallpox and proportion investigated by programme staff, 1967–1973.....	619
Table 12.14	Brazil: number of reporting centres, 1971–1973.....	621
Table 12.15	Brazil: results of national assessment of vaccinia immunity, 1972.....	621
Table 12.16	Brazil: age distribution of reported cases of and deaths from smallpox, and case-fatality rates, 1968–1969.....	621
Table 12.17	Brazil: expenditure in the programme, by source, 1966–1971.....	622
Table 12.18	Brazil: numbers of national personnel, vehicles and jet injectors in the programme, 1968–1971.....	622
Table 12.19	South America: reported production of freeze-dried vaccine, 1966–1972.....	623
Table 12.20	Brazil: number of doses of vaccine produced and number of vaccinations performed, 1967–1972.....	624

Chapter 13 Indonesia

Table 13.1	Indonesia: population and number and category of administrative units, by island, 1968.....	631
Table 13.2	Indonesia: number and population range of administrative units.....	632
Table 13.3	Indonesia: number of reported cases of smallpox, 1924–1940.....	632
Table 13.4	Java: Estimated population, 1965, and number of reported vaccinations in selected provinces, 1963–1967.....	634
Table 13.5	Java: proportion of children susceptible to smallpox, by age group; surveys of December 1967-January 1968.....	634
Table 13.6	Jakarta and East Java: age distribution of cases of smallpox, 1965–1966.....	634
Table 13.7	Indonesia: number of reported cases of smallpox, by province, 1963–1972.....	635
Table 13.8	WHO support for the Indonesia programme, 1967–1974.....	638
Table 13.9	Indonesia: principal items of equipment provided by WHO, 1968–1971.....	638
Table 13.10	Indonesia: number of primary vaccinations and revaccinations, 1968–1973.....	641
Table 13.11	Indonesia: number of reported cases of smallpox by province and month, 1969.....	642
Table 13.12	Jakarta: number of weeks after containment in which new cases were detected, 1968.....	643
Table 13.13	Java: population and number of vaccination staff and supervisors, June 1969.....	643
Table 13.14	Tjirebon, Bandung and Bogor Regencies: percentage of children unprotected by vaccination, by age group, October 1970.....	646
Table 13.15	Comparative percentage distribution of smallpox cases, by age group, 1969.....	647
Table 13.16	Indonesia: number of reported cases of smallpox, by province and month, 1970.....	650
Table 13.17	Indonesia: number of reported cases of smallpox, by province and month, 1971.....	653
Table 13.18	Kalimantan and Sulawesi: percentage of children unprotected by vaccination, by age group, February 1974.....	654
Table 13.19	Sangiang, Sarakan and Gaga villages, Sepatan Subdistrict: number of vaccinations performed during containment operations, 1972.....	654
Table 13.20	Indonesia: laboratory examination of specimens, 1969–1973.....	656
Table 13.21	Java: age distribution of 3823 cases of smallpox, 1968–1969.....	656

Chapter 14 Afghanistan and Pakistan

Table 14.1	Afghanistan: budget for the smallpox eradication project, 1969.....	666
----------------------------	---	-----

Table 14.2	Afghanistan: WHO support to the smallpox eradication programme, 1964–1977.....	666
Table 14.3	Afghanistan: results of scar surveys in 13 provinces by the WHO assessment team, by age group, August 1969.....	668
Table 14.4	Afghanistan: number of smallpox vaccinations in the 4 operational zones, 1969–1974.....	672
Table 14.5	Afghanistan: number of programme staff, by category, April 1971	672
Table 14.6	Helmand Province: vaccination scar survey of Kuchi nomads, by age group, October 1971	673
Table 14.7	Afghanistan: results of assessment for vaccination/variolation scars in 20 provinces, 1973	673
Table 14.8	Afghanistan: number of reported cases of smallpox and number of additional cases discovered by programme staff, 1969–1973	674
Table 14.9	Afghanistan: source of reporting of outbreaks, 1969–1973	674
Table 14.10	Afghanistan: reported number of cases of smallpox, by zone and province, 1963–1973	675
Table 14.11	Afghanistan: reported number of cases of and deaths from smallpox, by age group, 1969–1973	678
Table 14.12	Afghanistan: sources of infection of outbreaks, 1970–1973	681
Table 14.13	Afghanistan: number of outbreaks according to interval between first case and notification and between beginning of containment and last case, 1970–1973.....	682
Table 14.14	Afghanistan: number of cases of smallpox per outbreak, 1969–1973.....	682
Table 14.15	Afghanistan: results of laboratory testing of specimens collected from variolators.....	684
Table 14.16	Afghanistan: number of cases of smallpox due to variolation, 1970–1972.....	685
Table 14.17	Punjab Province of British India: number of vaccinations performed and number of cases of and deaths from smallpox, 1933–1938	686
Table 14.18	West Pakistan: number of reported vaccinations as a percentage of population and number of reported cases of smallpox, 1959–1968	686
Table 14.19	West Pakistan, Sheikhpura District: number of reported cases of and deaths from smallpox and case-fatality rates, by age group, 1966–1967.....	688
Table 14.20	West Pakistan, Sheikhpura District: secondary attack rates in infected compounds.....	688
Table 14.21	West Pakistan: plan for mass vaccination campaign-number of vaccinations to be performed each year, 1968-69–1970-71.....	690
Table 14.22	Pakistan: projected personnel requirements for the smallpox eradication programme, 1969	691
Table 14.23	Pakistan: WHO support provided to the smallpox eradication programme, 1967–1978	691
Table 14.24	Punjab Province: number of reported smallpox cases by district, 1967–1974.....	693
Table 14.25	North-west Frontier Province: number of reported cases of smallpox, by year and by district, 1971–1974	695
Table 14.26	Pakistan: number of reported cases of smallpox, by province, 1970–1975.....	696
Table 14.27	North-west Frontier Province: results of vaccination scar survey in children under 15 years of age in 5 districts, August 1973.....	697
Table 14.28	North-west Frontier Province: number of reported cases of smallpox, by age and by vaccination status, 1970–1974	698
Table 14.29	Lahore: frequency of cases of smallpox among, vaccinated and unvaccinated contacts, by age group	699
Table 14.30	Baluchistan: results of vaccination scar survey, in children 5 years of age and under, 1976.....	701
Table 14.31	Baluchistan: number of reported cases of smallpox, by district, 1970–1974	702
Table 14.32	Baluchistan: interval between onset of first case of smallpox and detection of outbreak, 1973–1974	703
Table 14.33	Baluchistan: number of cases of smallpox in outbreaks, 1973–1974.....	703

Table 14.34	Baluchistan: number of reported cases of and deaths from smallpox and case-fatality rates, by age group, 1971–1974.....	704
Table 14.35	Sind Province: number of reported cases of smallpox, by district, 1970–1975	705
Table 14.36	Sind Province: interval between first and last cases of smallpox in outbreaks, 1972–1974.....	706
Table 14.37	Sind Province: numbers of outbreaks and cases of smallpox, 1972–1974	706
Table 14.38	Sind Province: number of reported cases of and deaths from smallpox and case-fatality rates, by age group, 1972–1974.....	707
Table 14.39	Karachi: number of reported cases of and deaths from smallpox and case-fatality rates, by age group, 1973–1974	707
Table 14.40	Dera Ghazi Khan, Bahawalnagar and Rahimyar Khan: results of variolation scar survey, by age group, 1976	708
Table 14.41	Mohmand Agency: results of survey of variolation scars and pockmarks of smallpox, by age group, January 1976.....	708

Chapter 15 India and the Himalayan Area

Table 15.1	India: political divisions, area and population distribution, 1971	717
Table 15.2	India: population, number of recorded deaths from smallpox, average annual number of vaccinations, and percentage of population vaccinated annually, 1878–1937 (British India) and 1962–1971	717
Table 15.3	India: number of reported cases of smallpox, by state or union territory, 1962–1975	721
Table 15.4	India: numbers of reported vaccinations, percentages relative to population, and numbers of reported cases of and deaths from smallpox, 1962–1976.....	724
Table 15.5	India: vaccinator productivity and salary costs per vaccination performed, 1967	726
Table 15.6	India: age distribution of cases of smallpox in 4 states, 1967	727
Table 15.7	India: results of vaccination scar surveys in children in 4 states and 2 municipalities, by age group, 1967	728
Table 15.8	India: number of ampoules of freeze-dried vaccine produced each year, 1962–1977, by vaccine production centre, and donated vaccine distributed, 1970–1974	729
Table 15.9	India: results of simultaneous revaccination of children with the rotary lancet and the bifurcated needle.....	731
Table 15.10	Southern India: number of reported cases of smallpox, 1967–1970	734
Table 15.11	Western India: number of reported cases of smallpox, 1967–1970	735
Table 15.12	India: estimated expenditures for smallpox eradication, 1965–1977, by source.....	737
Table 15.13	Western India: number of reported cases of smallpox, 1971–1973	740
Table 15.14	India: number of reported cases of smallpox, by state and union territory and by month, 1971.....	743
Table 15.15	Southern India: number of reported cases of smallpox, 1971–1973	745
Table 15.16	India: number of special epidemiologists working in the field, October 1973–July 1975	757
Table 15.17	Bihar, Uttar Pradesh and Madhya Pradesh: results of the 1973 search for outbreaks of smallpox	760
Table 15.18	India: searches for outbreaks of smallpox in low-incidence states and union territories, 1973.....	761
Table 15.19	India: searches for outbreaks of smallpox in smallpox-free states or union territories, 1973	761
Table 15.20	India: number of reported cases of smallpox, by state and union territory and by month, 1973.....	761
Table 15.21	India: number of reported cases of smallpox, by state and union territory and by month, 1974.....	766
Table 15.22	India: principal supplies and items of equipment provided by WHO, 1970–1976.....	769

Table 15.23	India: frequency of active searches for outbreaks of smallpox, 1973–1975.....	770
Table 15.24	India: approximate number of workers, per search, 1973–1976	770
Table 15.25	India: pending outbreaks of smallpox at the end of each month, 1974–1975	778
Table 15.26	India: methods of detecting outbreaks of smallpox, 1973–1975	781
Table 15.27	India: interval between onset of outbreaks of smallpox and their detection, 1973–1975.....	781
Table 15.28	India: interval between onset of first and last case of smallpox, 1973–1975	781
Table 15.29	India: distribution of outbreaks of smallpox by size and year, 1973–1975.....	781
Table 15.30	India: estimated manpower employed and costs of a typical containment operation, 1975.....	786
Table 15.31	India: number of reported cases of smallpox, by state and by month, 1975.....	787
Table 15.32	India: newly detected outbreaks of smallpox by state and by month, 1975	787
Table 15.33	India: number of reported cases of and deaths from smallpox and case-fatality rate in 17 states and union territories, by age group, 1974–1975.....	791
Table 15.34	India: vaccination status of cases of smallpox in 17 states and union territories, by age group, 1974–1975	791
Table 15.35	Nepal: financial inputs by the government of Nepal and WHO for smallpox eradication, 1962–1976	795
Table 15.36	Nepal: number of vaccinations performed, 1962–1976	795
Table 15.37	Nepal: reported number of cases of smallpox, by districts reporting cases, 1963–1975.....	796
Table 15.38	Nepal: number of outbreaks of smallpox, by number of cases in each outbreak, 1973–1975.....	798
Table 15.39	Nepal: age distribution of 1286 cases of smallpox, 1973–1975.....	799
Table 15.40	Sikkim and Bhutan: number of reported vaccinations, 1967–1975	801
Table 15.41	Bhutan: survey of vaccinia immunity and facial pockmarks in children, by age group, 1976.....	802
Table 15.42	Bhutan: number of reported cases of smallpox and sources of outbreaks, 1966–1974.....	803

Chapter 16 Bangladesh

Table 16.1	Bangladesh: administrative units in 1972	809
Table 16.2	Bangladesh: population and number of reported vaccinations and number of reported cases of smallpox, 1961–1976.....	812
Table 16.3	Matlab <i>Thana</i> study area, Comilla District: vaccination scar survey, 1967, by age group	813
Table 16.4	Matlab <i>Thana</i> study area, Comilla District: number of reported cases of deaths from smallpox and case-fatality rates, 1967, by age group	813
Table 16.5	Bangladesh: support provided to the smallpox eradication programme, 1967–1977, by source	815
Table 16.6	Dhaka Municipality: vaccination scar survey, 1969, by age group.....	815
Table 16.7	Bangladesh: vaccine production at the Dhaka laboratory and vaccine donations, 1972–1977	816
Table 16.8	Bangladesh: transport provided to the smallpox eradication programme, 1967–1975.....	822
Table 16.9	Bangladesh: number of reported cases of smallpox as a percentage of the estimated number of cases (surveillance efficiency), 1972–1975.....	824
Table 16.10	Dhaka Municipality: number of reported cases of and deaths from smallpox, by month, 1972–1973	824
Table 16.11	Bangladesh: number of reported cases of smallpox, by division and by month, 1972–1973.....	824
Table 16.12	Bangladesh: number of infected villages, by district and by month, 1974–1975.....	826
Table 16.13	Bangladesh: number of reported cases of smallpox, by division and by month, 1974.....	832

Table 16.14	Bangladesh: average numbers of international staff and national epidemiologists employed in the smallpox eradication programme, by 3-month period, 1972–1977	837
Table 16.15	Bangladesh: cross-notifications of suspected cases of smallpox within the country, 1975	840
Table 16.16	Bangladesh: personnel employed during the 3-month period of maximum containment of the smallpox eradication programme, May–July 1975	841
Table 16.17	Bangladesh: cases of and deaths from smallpox and case-fatality rates in 165 outbreaks, by age and sex, 1975	847

Chapter 17 Western and Central Africa

Table 17.1	Western and Central Africa: number of reported cases of smallpox, by country, 1961–1970	852
Table 17.2	Estimate of needs for western and central African programme, 1967–1971	860
Table 17.3	Western and central Africa: smallpox vaccination team operations in the attack phase (as at May 1969), by country:	866
Table 17.4	Western and central Africa: surveillance activities at different phases of the programme	871
Table 17.5	Western and central Africa: selected coverage figures for countries carrying out systematic assessment, 1969, by age	874
Table 17.6	Western and central Africa: results of cluster sample surveys in five areas, 1968–1969: (A) by age; (B) by country or area	874
Table 17.7	Western and central Africa: number of cases of smallpox reported and detected in 9 countries, 1968	878
Table 17.8	Western and central Africa: number of reported cases of smallpox by country and by month, 1969–1970	879
Table 17.9	Western and central Africa: number of reported smallpox vaccinations (thousands), by country, 1967–1972	881
Table 17.10	Nigeria: number of cases of and deaths from smallpox, and case-fatality rate, in Kano Infectious Diseases Hospital, by age, 1967–1970	882
Table 17.11	Nigeria: number and percentage distribution of cases of smallpox by age and percentage distribution of general population by age, 1967–1968	884
Table 17.12	Dahomey and Togo: number of reported cases of smallpox, 1962–1969	888
Table 17.13	Togo: levels of smallpox immunity by age, January 1969	890
Table 17.14	Togo: number of cases of smallpox by month, 1969	891
Table 17.15	Amecho-Vogan area, Togo: vaccinal immunity by age before and after April 1969, as ascertained by survey in September 1969	891
Table 17.16	Togo: number and percentage distribution of cases of smallpox by age, 1967–1969	892
Table 17.17	Mali, Niger and Upper Volta: numbers of reported cases of smallpox and vaccinations performed, 1962–1969	893
Table 17.18	Guinea and Sierra Leone: number of reported cases of smallpox, 1960–1969	897
Table 17.19	Guinea and Sierra Leone: number of cases of and deaths from smallpox and case-fatality rate, by age, 1968–1969	901
Table 17.20	Côte d’Ivoire, Ghana and Liberia: number of reported cases of smallpox, 1961–1968	901
Table 17.21	Gambia, Mauritania, Senegal: number of reported cases of smallpox, 1961–1967	904
Table 17.22	OCEAC countries: number of reported cases of smallpox, 1961–1969	907

Chapter 18 Zaire and Sudan

Table 18.1	Zaire: number of reported cases of and deaths from smallpox, and case-fatality rates, 1956–1971	914
Table 18.2	WHO support for the Zaire programme, 1967–1975	916
Table 18.3	Zaire: number of reported cases of smallpox, by province and year, 1967–1971	920
Table 18.4	Zaire: inventory of major equipment, by year, 1968–1972	922
Table 18.5	Zaire: smallpox eradication programme staff, by category and year, 1968–1972.....	922
Table 18.6	Zaire: number of reported cases of smallpox, by province and month, 1970 and 1971	923
Table 18.7	Zaire, Basankusu Territory: results of vaccination scar survey, by age group, 1970	924
Table 18.8	Zaire: population and number of reported smallpox and BCG vaccinations, by province, March 1968–July 1971	926
Table 18.9	Zaire: number of reported cases of smallpox, by age group and vaccination status, 1969–1971	926
Table 18.10	Zaire: results of laboratory examination of specimens, 1971–1976.....	929
Table 18.11	Zaire: number of smallpox vaccinations performed by health establishments, 1968–1975	929
Table 18.12	Zaire: results of vaccination scar surveys, by age group and province, 1972 and 1974.....	929
Table 18.13	Zaire: receipt of weekly epidemiological reports, 1975–1976	929
Table 18.14	Sudan: number of reported cases of and deaths from smallpox, and case-fatality rates, 1952–1972	932
Table 18.15	Sudan: population and number of reported cases of smallpox, by region and province and by year, 1966–1973.....	932
Table 18.16	WHO support and national contribution to the Sudan programme, 1967–1976	933
Table 18.17	Sudan: number of reported cases of smallpox, by age group and sex, January–April 1969	936
Table 18.18	Sudan: number of reported vaccinations, 1968–1975	937
Table 18.19	Southern Sudan: number of health establishments, by category and province.....	938
Table 18.20	Sudan: results of vaccination scar survey, by age group and province, 1975–1976.....	941
Table 18.21	Sudan: number of reported cases of smallpox, by age group and sex, 1970–1972	941

Chapter 19 Eastern Africa: Kenya, Uganda, United Republic of Tanzania, Rwanda and Burundi

Table 19.1	Eastern Africa: population and number of reported cases of smallpox, 1965–1977	947
Table 19.2	Eastern Africa: number of reported vaccinations and proportion of population vaccinated each year, 1967–1973.....	948
Table 19.3	Kenya, Uganda and Tanzania: number of cases of and deaths from smallpox, and case-fatality rates, 1961–1970.....	949
Table 19.4	WHO support for the programmes in eastern Africa, 1967–1974.....	950
Table 19.5	Eastern Africa: freeze-dried vaccine supplied through WHO, from 1967 onwards	951
Table 19.6	Eastern Africa: number of reported cases of smallpox, by month, 1969–1970.....	952
Table 19.7	Eastern Africa: principal components of support to the programmes (exclusive of vaccine)	955
Table 19.8	Kenya: results of vaccination scar surveys in 5 provinces, by age group, 1972.....	956
Table 19.9	Northern Uganda: results of vaccination scar surveys, by age group, 1972.....	957
Table 19.10	Tanzania, Geita District: results of vaccination scar survey, by age group, 1969	958
Table 19.11	Tanzania: results of vaccination scar surveys in 6 regions, by age group, 1970	958
Table 19.12	Rwanda: results of vaccination scar surveys in 3 prefectures, by age group, 1968.....	959
Table 19.13	Burundi: results of vaccination scar surveys in 3 prefectures, by age group, June 1968.....	962

Table 19.14	Burundi: results of vaccination scar survey, by age group, 1973.....	962
Table 19.15	Rwanda: number of cases of smallpox, by age group, 1969–1970	964

Chapter 20 Southern Africa

Table 20.1	Status of political jurisdictions in southern Africa, 1967–1975	970
Table 20.2	Zambia: number of reported cases of and deaths from smallpox and case fatality rates, 1956–1973, and number of vaccinations performed, 1964–1973	972
Table 20.3	Zambia: age distribution of reported cases of smallpox, 1964–1965 and 1966–1968	974
Table 20.4	Malawi, Mozambique and Southern Rhodesia: number of reported cases of and deaths from smallpox and case-fatality rates, 1959–1972	975
Table 20.5	Malawi, Mozambique and Southern Rhodesia: number of reported vaccinations performed, 1964–1973	976
Table 20.6	United Republic of Tanzania, Malawi, Mozambique and Southern Rhodesia: number of cases of smallpox, by 3-month period, 1968–1971.....	978
Table 20.7	Malawi: number of reported cases of smallpox, by age group, 1960–1965	980
Table 20.8	Mozambique: number of reported cases of smallpox, by age group, 1968	981
Table 20.9	South Africa: number of reported cases of and deaths from smallpox and case fatality rates, 1951–1972	982
Table 20.10	South Africa: number of reported cases of smallpox, by province, 1960–1972.....	984
Table 20.11	Botswana: number of reported cases of smallpox, 1959–1974	988
Table 20.12	Botswana: number of smallpox vaccinations performed, 1965–1977.....	988
Table 20.13	Botswana: number of reported cases of smallpox, by month, 1971–1974	992
Table 20.14	Botswana: number of reported cases of smallpox, population by district, and number of vaccinations performed, 1971–1973	993
Table 20.15	Botswana: results of vaccination scar surveys, by age group and district, January-March, 1973	993
Table 20.16	Botswana: number of reported cases of and deaths from smallpox, by age group and vaccination status, 1971–1972	994

Chapter 21 Ethiopia, Yemen and Democratic Yemen

Table 21.1	Yemen: WHO support provided to the smallpox eradication programme, 1967–1979	1000
Table 21.2	Yemen: number of vaccinations performed and number of reported cases of smallpox, 1967–1975	1000
Table 21.3	Yemen: results of vaccination scar survey, by governorate and by age, 1978–1979	1002
Table 21.4	Democratic Yemen: WHO support provided to the smallpox eradication programme, 1967–1979	1004
Table 21.5	Democratic Yemen: number of vaccinations performed and number of reported cases of smallpox, 1967–1975.....	1004
Table 21.6	Ethiopia: WHO and government support to the smallpox eradication programme, 1969–1979	1010
Table 21.7	Ethiopia: demographic data, by zone and province and number of health facilities, 1971	1011
Table 21.8	Ethiopia: number of reported cases of smallpox and numbers of vaccinations performed, 1971–1977	1016
Table 21.9	Ethiopia: staffing patterns, 1971–1979	1016
Table 21.10	Ethiopia: status of smallpox as at 23 July 1975	1026
Table 21.11	Ethiopia: number of active outbreaks at month's end, January-September 1976	1029

Table 21.12	Ethiopia: number of reported cases of and deaths from smallpox and case-fatality rates, by age, 1971–1976	1033
Table 21.13	Ethiopia: secondary attack rates among susceptible household contacts, by age, 1971–1974	1033

Chapter 22 Somalia and Djibouti

Table 22.1	Somalia and the French Territory of the Afars and the Issas: numbers of reported cases of and deaths from smallpox, 1962–1978	1041
Table 22.2	Somalia: results of vaccination scar surveys, by age group, 1967 and 1968	1042
Table 22.3	Somalia: expenditure by WHO for smallpox eradication and number of doses of vaccine supplied, 1967–1979	1042
Table 22.4	Somalia: number of vaccinations performed, 1969–1978	1043
Table 22.5	Somalia: number of field staff, by category and by month, 1977	1052
Table 22.6	Somalia: reported smallpox cases by month and region, 1977	1052
Table 22.7	Somalia: prolonged transmission of smallpox among groups of nomads	1057
Table 22.8	Somalia: interval between onset of the first and last cases in the same outbreak, by month of onset, 1977	1059
Table 22.9	Somalia: distribution of smallpox outbreaks, by size and month, 1977	1059
Table 22.10	Somalia: number of smallpox-affected localities, by population size and month, 1977	1060
Table 22.11	Somalia: results of survey of refugee camps, February 1978	1061
Table 22.12	Somalia: reported number of cases of smallpox, by age group, 1977	1064

Chapter 23 Smallpox in Non-Endemic Countries

Table 23.1	Annual numbers of importations of smallpox into industrialized countries, 1959–1978	1070
Table 23.2	Importations of smallpox into Europe by travellers, 1959–1974	1074
Table 23.3	Delays in notification and the extent of spread of smallpox in 30 outbreaks in Europe, 1959–1973	1076
Table 23.4	Europe: smallpox outbreaks by generation	1077
Table 23.5	Europe: seasonal influence on the numbers of importations of smallpox and the size of outbreaks following importations	1078
Table 23.6	Africa: last year of smallpox endemicity in individual countries or territories	1083
Table 23.7	Africa: non-endemic countries experiencing importations, 1967–1976, by region	1084
Table 23.8	South America: reported importations of smallpox into non-endemic countries, 1959–1970	1085
Table 23.9	Importations of smallpox into non-endemic countries adjacent to India, 1967–1974	1085
Table 23.10	Importations of smallpox into non-endemic countries of south-western Asia, 1967–1972	1086
Table 23.11	Laboratory-associated outbreaks of smallpox in the United Kingdom	1095

Chapter 24 The Certification of Eradication: Concepts, Strategy and Tactics

Table 24.1	Country of origin and number of specimens tested by the WHO collaborating centres in Atlanta and Moscow between 1969 and 1979	1120
----------------------------	---	------

Chapter 25 Certification by International Commissions: 1973–1977

Table 25.1	South America: number of reported cases of smallpox, 1966–1972	1151
----------------------------	--	------

Table 25.2	Brazil: location and number of surveillance units in 1973.....	1152
Table 25.3	Brazil: results of survey conducted in high-risk areas in 1972.....	1153
Table 25.4	Brazil: investigations of suspected cases of smallpox, 1971–1973.....	1153
Table 25.5	Numbers of specimens from suspected cases of smallpox received by the WHO collaborating centre, Atlanta, USA, from countries in South America, 1967–1977.....	1156
Table 25.6	Indonesia: number of reported cases of smallpox in various islands, 1967–1973.....	1157
Table 25.7	Indonesia: routine reporting of cases of suspected smallpox, May 1972–February 1974.....	1158
Table 25.8	Indonesia: laboratory diagnosis of suspected cases of smallpox, 1971–1973.....	1159
Table 25.9	Western Africa: number of reported cases of smallpox, 1966–1971.....	1163
Table 25.10	Nigeria: number of localities selected for facial pockmark surveys, by population size.....	1165
Table 25.11	Western Africa: results of facial pockmark surveys carried out in 1975–1976.....	1165
Table 25.12	Western Africa: results of laboratory investigation of suspected cases of smallpox by the WHO collaborating centre, Atlanta, USA, January 1972–April 1976.....	1166
Table 25.13	Central Africa: number of reported cases of smallpox, 1965–1972.....	1168
Table 25.14	Central Africa: results of pockmark surveys, 1976–1977.....	1169
Table 25.15	Central Africa: number of specimens from suspected cases of smallpox submitted to WHO collaborating centres for laboratory diagnosis, 1972–1976.....	1170
Table 25.16	Afghanistan: outbreaks of smallpox, 1970–1973.....	1172
Table 25.17	Afghanistan: results of laboratory tests of specimens of variolation material obtained from variolators.....	1173
Table 25.18	Pakistan: number of reported cases of smallpox, 1970–1975, by province or area.....	1175
Table 25.19	Pakistan: number of cases of fever with rash investigated and number of cases of chickenpox reported between October 1974 and September 1976, by province or area.....	1177
Table 25.20	Pakistan: results of laboratory tests of specimens of variolation material obtained from variolators.....	1177
Table 25.21	Number of reported cases of smallpox in 4 countries of the Indian subcontinent and Burma, 1967–1976.....	1179
Table 25.22	India: country-wide searches, 1975–1976.....	1182
Table 25.23	India: entries in registers of cases of fever with rash during 1976 and the first quarter of 1977.....	1184
Table 25.24	India: results of laboratory tests for variola virus, January 1975–April 1977.....	1185
Table 25.25	Bangladesh: numbers of international and national epidemiologists engaged in surveillance, 1975–1977.....	1189
Table 25.26	Bangladesh: house-to-house searches, May 1975–October 1977.....	1190
Table 25.27	Bangladesh: results of pockmark survey, 1976.....	1191
Table 25.28	Bangladesh: results of tests of specimens from suspected cases of smallpox by the Institute of Public Health, Dhaka, and WHO collaborating centres, 1976–1977.....	1191

Chapter 26 Certification of 29 Countries in Africa and Asia: 1978–1979

Table 26.1	Numbers of reported cases of smallpox in 12 countries of southern Africa, 1967–1974.....	1198
Table 26.2	Malawi, Mozambique, United Republic of Tanzania, and Zambia: results of facial pockmark surveys conducted during precertification activities, 1977–1978.....	1201
Table 26.3	Malawi, Mozambique, United Republic of Tanzania, and Zambia: laboratory examination of specimens from cases clinically diagnosed as chickenpox, 1977–1978.....	1201

Table 26.4	Botswana, Lesotho and Swaziland: results of facial pockmark surveys conducted during precertification activities, 1978–1979	1203
Table 26.5	Botswana, Lesotho and Swaziland: laboratory examination of specimens from cases clinically diagnosed as chickenpox, 1978–1979	1203
Table 26.6	Botswana, Lesotho and Swaziland: results of facial pockmark surveys carried out by members of the International Commission in March 1979	1204
Table 26.7	South Africa: results of facial pockmark and vaccination scar surveys in 1978, by age group and type of locality	1207
Table 26.8	South Africa: results of examination by WHO collaborating centres of specimens collected from cases clinically diagnosed as chickenpox.....	1207
Table 26.9	Namibia: results of facial pockmark and vaccination scar surveys in April–November 1978, by age group.....	1208
Table 26.10	Southern Rhodesia: results of facial pockmark and vaccination scar surveys in January–April 1978, by age group.....	1208
Table 26.11	Angola: results of facial pockmark survey in July–December 1978, by age group.....	1211
Table 26.12	Madagascar: number of reported cases of and deaths from chickenpox, 1972–1978	1212
Table 26.13	Uganda: results of facial pockmark surveys by national authorities, April–September 1978, and by International Commission members, October 1978, by age group	1214
Table 26.14	Sudan: results of facial pockmark surveys conducted by smallpox eradication programme staff between 1975 and 1977, and by members of the International Commission in November 1978, in all provinces, by age group	1215
Table 26.15	Sudan: number of reported cases of and deaths from chickenpox between 1973 and 1977 and number of specimens tested	1215
Table 26.16	Yemen: results of facial pockmark survey during active searches, 1978–1979	1219
Table 26.17	Democratic Yemen: results of facial pockmark surveys by national teams, February 1978–February 1979, and by members of the International Commission, June 1979, by age group	1220
Table 26.18	Arab countries of the Gulf area: results of precertification investigations, January–July 1978.....	1220
Table 26.19	Thailand, Democratic Kampuchea, Lao People's Democratic Republic and Viet Nam: numbers of reported cases of smallpox, 1952–1963.....	1224

Chapter 27 The Completion of Global Certification: The Horn of Africa and China

Table 27.1	Ethiopia: results of laboratory examinations of specimens submitted to WHO collaborating centres, 1977–1979.....	1234
Table 27.2	Somalia: assessment of public awareness of smallpox activities among settled and nomadic populations, July 1978–June 1979.....	1240
Table 27.3	Somalia: results of laboratory examinations of specimens submitted to WHO collaborating centres, 1977–1979.....	1240
Table 27.4	Kenya: results of active search operations, September 1977–March 1978, by district.....	1242
Table 27.5	Horn of Africa: numbers of specimens tested by WHO collaborating centres during 1978 and 1979	1248
Table 27.6	China: numbers of reported cases of smallpox between 1957 and 1965, by province and autonomous region, 1957–1965.....	1255
Table 27.7	Yunnan Province: numbers of reported cases of smallpox, 1958–1962, by county	1257
Table 27.8	Yunnan Province: results of vaccination scar survey among rural and urban populations, March–May 1979, by age group	1257

Table 27.9	Yunnan Province: results of facial pockmark survey in counties near the border with Burma, and Kunming municipality, March-May 1979.....	1258
Table 27.10	Yunnan Province: age distribution of 1020 pockmarked persons, May 1979.....	1258
Table 27.11	Xizang Autonomous Region (Tibet): age-specific vaccination scar and facial pockmark rates, August 1979.....	1259

Chapter 28 Post-Eradication Operations: Implementation of the Recommendations of the Global Commission

Table 28.1	Number of countries carrying out vaccination against smallpox, by WHO region, 1976–1985.....	1265
Table 28.2	Smallpox vaccine titres after long-term storage: typical results from laboratories in 4 countries.....	1267
Table 28.3	Smallpox vaccine reserve stocks: typical results of initial and subsequent tests of batches provided by manufacturers in 7 countries, 1978–1983.....	1269
Table 28.4	Known national stocks of smallpox vaccine, by WHO region, 1985.....	1270
Table 28.5	Countries producing smallpox vaccine, 1977–1985, and countries holding seed lots, 1985, by WHO region.....	1271
Table 28.6	International rumour register: suspected cases of smallpox reported to WHO Headquarters, Geneva, by WHO region, 1980–1986.....	1272
Table 28.7	Inspections of laboratories holding stocks of variola virus, 1978–1986.....	1276
Table 28.8	Numbers of specimens (lesion material and sera) examined for evidence of orthopoxvirus infection by the WHO collaborating centres in Atlanta and Moscow, by WHO region, 1980–1984.....	1281

Chapter 29 Human Monkeypox and Other Poxvirus Infections of Man

Table 29.1	Poxvirus infections of man.....	1288
Table 29.2	Outbreaks of monkey pox in captive primates.....	1289
Table 29.3	Human monkey pox: areas of tropical rain forest and annual numbers of cases reported in countries in western and central Africa, 1970–1984.....	1296
Table 29.4	Number of positive results of laboratory tests in cases clinically diagnosed as human monkey pox, 1970–1984.....	1302
Table 29.5	Human monkeypox in Zaire, 1970–1984: vaccination status, age distribution of unvaccinated patients and severity of illness (including deaths).....	1302
Table 29.6	Evidence of infection with monkeypox virus among close contacts of cases of human monkeypox in Zaire, 1982–1984.....	1303
Table 29.7	Human monkeypox: the age incidence of primary and secondary cases in Zaire, 1982–1984.....	1304
Table 29.8	Human monkeypox: monthly incidence of primary and secondary cases in Zaire, 1982–1984, calculated from date of onset.....	1304
Table 29.9	Human monkeypox: occurrence of primary and secondary cases in Zaire, 1982–1984.....	1305
Table 29.10	Human monkeypox: results of serological survey among allegedly unvaccinated persons inhabiting villages in tropical rain forest areas of 4 countries of central and western Africa, 1981.....	1307
Table 29.11	Results of haemagglutination-inhibition, radioimmunoassay and radioimmunoassay adsorption tests on monkey and squirrel sera collected in Zaire in July 1979.....	1309
Table 29.12	Results of haemagglutination-inhibition, radioimmunoassay and radioimmunoassay adsorption tests on sera from animals living in the settlements and agricultural areas adjacent to selected villages in Zaire, 1985–1986.....	1310

Table 29.13	Features of 16 virologically confirmed cases of infection of humans with cowpox virus in England	1312
Table 29.14	Animals from which cowpox virus has been recovered.....	1313
Table 29.15	Evidence of cowpox virus infection in white rats in Moscow and in wild rodents in Turkmenia.....	1314

Chapter 30 Potential Sources for a Return of Smallpox

Table 30.1	Episodes of presumed or proved naturally occurring “pox” infection in non-human primates.....	1323
Table 30.2	Details of the circumstances of the recovery in Moscow of “whitepox” viruses from wild animals captured in Zaire.....	1328
Table 30.3	The distribution of 4 independent biological properties characteristic of Asian variola major virus according to the geographical origin of the strains tested	1330
Table 30.4	The derivations of various viral strains and the nature of their genomes as determined by restriction endonuclease analysis	1331
Table 30.5	Phenotypic characteristics of white pock mutants of monkeypox virus.....	1331
Table 30.6	Laboratories holding variola virus stocks in 1975 and the reduction in this number by July 1977, in response to requests from WHO	1340
Table 30.7	Laboratories holding variola virus stocks at the end of calendar years 1977–1983	1340

Chapter 31 Lessons and Benefits

Table 31.1	Estimated cost of smallpox to the developing countries, 1967	1364
Table 31.2	Costs associated with smallpox protection in the USA, 1968.....	1365
Table 31.3	Expenditure on smallpox eradication, 1967–1979	1366
